## SKILLS

---

**Languages** Python, C, HTML, CSS, JavaScript, SQL

**Technologies** Flask, React, Linux, Git

## WORK EXPERIENCE

---

**Research Intern** Jun 2022 - Aug 2022

Stanford University *Palo Alto, CA*

- Investigate the effect of climate change misinformation on Twitter
- Analyzed the amount of times different terms were repeated in 1,000 tweets related to climate change hashtag
- Utilized Tweepy functions accordingly to scrape data from the Twitter API
- Create visualization graphs to illustrate the data that we collected by using Python

**Research Assistant** Jan 2017 - Jan 2019

Worcester Polytechnic Institute *San Francisco, CA*

- Investigated the effects of data visualization on different group of population.
- Assisted in building a website for user online experiment using HTML, CSS, JavaScript and interfacing bootstrap.
- Analyze data from over 100 participants from 11 countries in the online experiment.

## PROJECTS

---

### Budgeting Track

- Built an app that tracks your spendings and calculate your budget.
- Utilized Google Charts API to provide analysis of graphs based the user inputs on two categories: spending category and budget categories.
- Used SQL to enable users to store, and update their expenses.

## EDUCATION

---

**Master of Computer Science**, Harvard University *Expected 2026*

GPA 3.704/4.00

**Relevant courses:** data science, statistics, web development, calculus

**Leadership & Activities:** Finance Coordinator at Harvard College in Asia Program, Finance Associate at Harvard Global Education Movement, First Year Representative at Harvard Vietnamese Association, Volunteer at Harvard Square Homeless Shelter.
